Layering Objects

You can hide objects on your flipchart page and reveal them when you want by using layers.
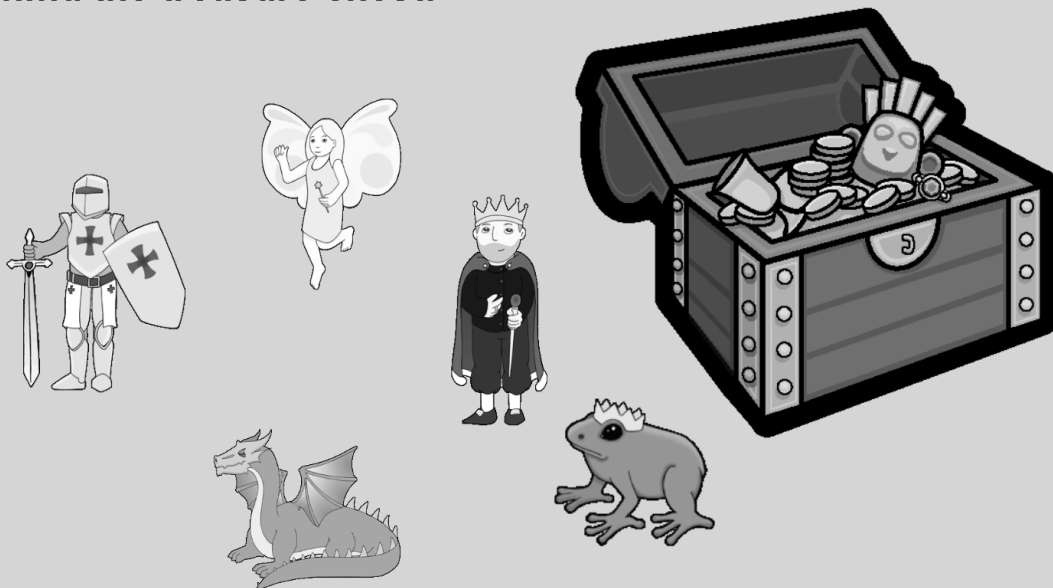

Drag the objects from behind the treasure chest.
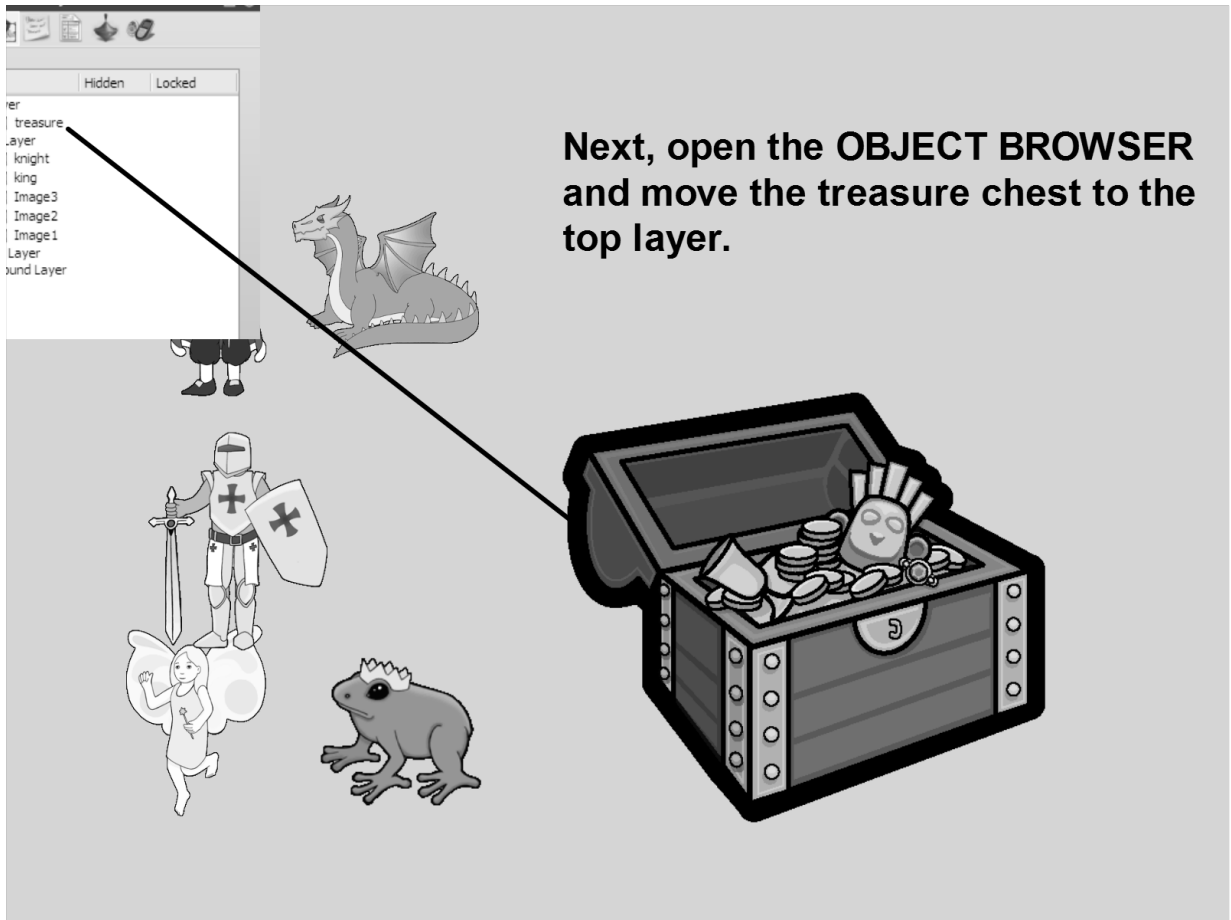

First, open the RESOURCE BROWSER and choose all the images you want to use.

I am going to hide these fairy tale characters behind the treasure chest.

Hidden | Locked

...ver
| treasure
...ayer
| knight
| king
| Image3
| Image2
| Image1
| Layer
...ound Layer

Next, open the OBJECT BROWSER and move the treasure chest to the top layer.

File Edit View Insert Tools Help   Untitled* ⊗   Page 5 of 6 Best Fit

...al   ▾ 24 ▾ T⁺ T⁻ | **B** *I* U T¹ T₁ | ■⊠ | ≣ ≣ ≡ ≣⁺ ≡⁺ ⇥ ⇤ ⁝≣ | ⊞ ▦ Σ

Now, right click on the treasure chest and choose
LOCKED from the dropdown menu.

	Property Browser	F9
	Action Browser	F10
	Insert link to file...	
✂	Cut	Ctrl+X
	Copy	Ctrl+C
	Paste	Ctrl+V
	Duplicate	Ctrl+D
✕	Delete	Del
	Transform	
	Reorder	
🔒	Locked	Ctrl+Shif
	Grouped	Ctrl+G
	Hidden	Ctrl+Shif
	Drag a Copy	Ctrl+Shif

Finally, slide all the objects you wish to hide so they are behind the treasure chest.
Because the treasure chest is on the top layer and the objects are in the middle layer, the objects will be concealed*.

*I have partially conceled some objects to illustrate the concept. You can move them around to see.

Layering Objects example

Insects	Arachnids

Pull the animals from behind the face and place in the correct category.
