Using Color to → **Reveal a response**
This is just an illusion using color. If you drag the text above left or right, some of the text disappears.
This flipchart shows you how to do it!

First, use the paint bucket to drop color onto your flipchart page.

Next, click on the shape tool and create a rectangle on 1/2 of your flipchart page. Use the paint bucket to make it a different color from the main part of your page.
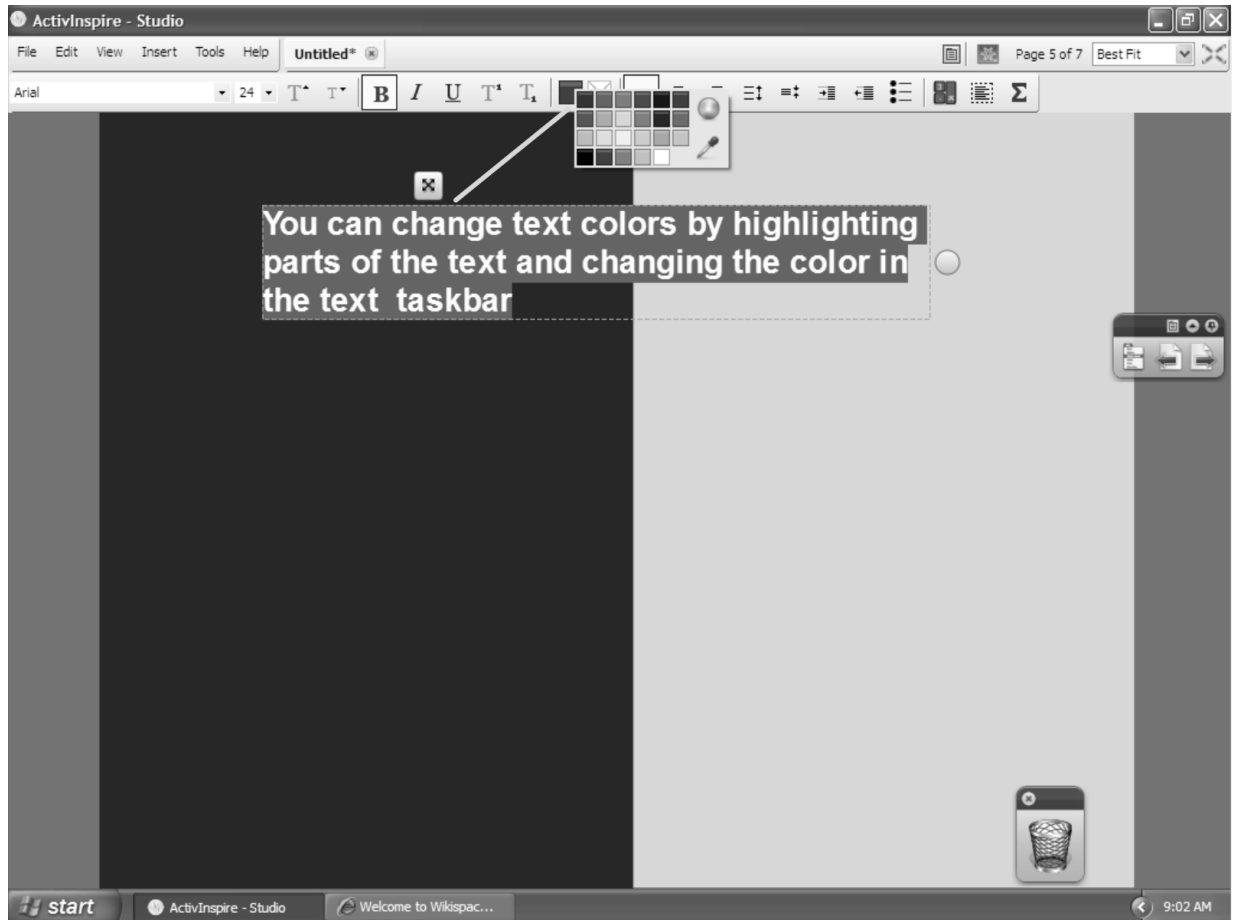

*It is a good idea to lock the rectangle in place on the page. To do this, right click on the rectangle and choose LOCKED from the dropdown menu.
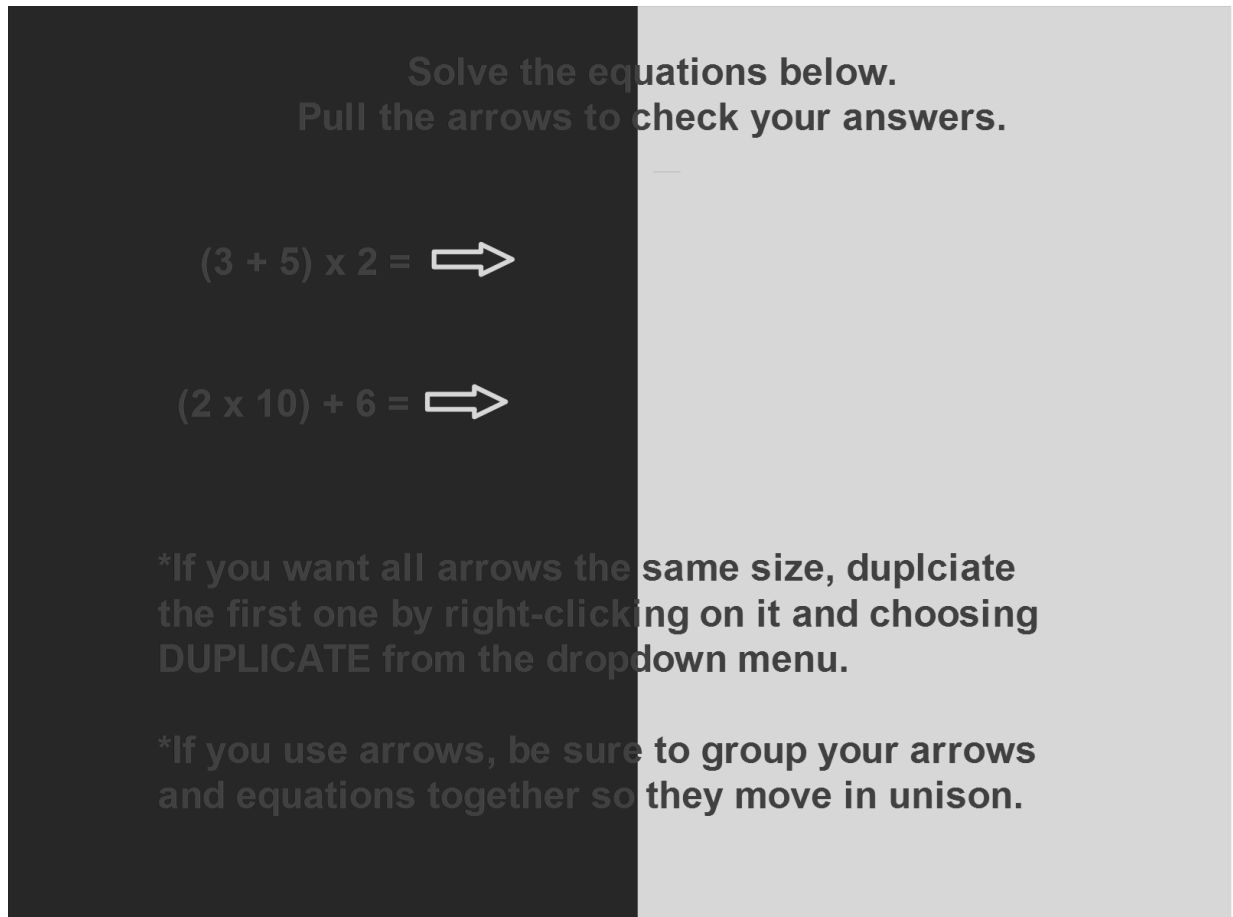

You will now type the text using two colors.
When working on the blue side, I used the same yellow as the main part of my page. When working on the yellow side,
I used the same blue as my rectangle.

*This can get tricky so you may want to type all text in black and then highlight certain text and change colors later.

File   Edit   View   Insert   Tools   Help   Untitled* ⊗

Arial   24   **B** *I* U T¹ T₁

You can change text colors by highlighting parts of the text and changing the color in the text taskbar

Solve the equations below.
Pull the arrows to check your answers.

$(3 + 5) \times 2 = \Rightarrow$

$(2 \times 10) + 6 = \Rightarrow$

*If you want all arrows the same size, duplciate the first one by right-clicking on it and choosing DUPLICATE from the dropdown menu.

*If you use arrows, be sure to group your arrows and equations together so they move in unison.

Page 6

Here is another example using colors. Note that I made the text *too small* to be seen easily on the Promethean Board. <u>Be sure your text is large enough for students in the back of the room to see.</u>

The capitol of Ohio is ➡

The Rock and Roll Hall of Fame is in ➡

The Governor of Ohio is ➡
